

AV/Tech Rider

SOUND

- Two (2) wireless microphones. I'll work with any mic you have, but here's our preference; 1st choice - Lapel/Lavalier, 2nd choice - Handheld, 3rd choice - Countryman/Headset.

1st

2nd

3rd

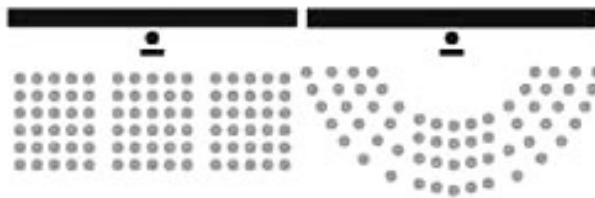

VIDEO

- Playing videos (with sound) and slides from my own laptop. Please provide projector with image and sound hook up to laptop. I will bring any necessary adapters for mac/pc.

SEATING

- Auditorium Seating with the audience in rows facing the stage. No tables or seating behind the stage please. Would like the audience members as close and towards the middle as possible.

Type: Auditorium/Theatre Style

LIGHTS

- Our first choice would be to have the house lights on dim. If that's not possible, then having them all the way on is good too.

TABLE

- Tall table or standard table off to the side if one is available. Something to place our water bottle, props and laptop on.

WATER

- Please supply two bottles of room temperature water or advise know where the fountain is.

SOUND CHECK

- Your speaker will arrive two hours before the presentation to check sound, lights, video, etc. Please have a technician available at that time.

RECORDING

- If you have a student or volunteer who is interested in video, we would love for you to ask them to record our presentation. It could be on their phone, a DSLR, or a professional camera. If recording sound through the sound board is possible, we will also bring a USB or recorder.
